

## CHURCH INTERIOR COLOR PALLET

PLEASE NOTE: This is a VERY rough draft image of a proposed color pallet for the interior look of the Sanctuary designed by our Committee for conversational purposes only.

Each item can be found with more detail on the "Idea Board"

We will be recommending dark full-wooden pews with neutral tan-colored seat cushions, finished original heart pine flooring through out the entire Sanctuary, potential brick exposed walls, and white painted-plaster, dark trimmed windows, white ceiling with wood-gained coffered details, and the current hanging, lighting fixtures. Chancel Furniture will be recommended to be re-stained to match the new pews.

Once a Contractor is selected, please remember an interior designer will be heavily involved and may make additional (and better) recommendations to our group that may alter these ideas.
